DETAILED ACTION

Information Disclosure Statement

The information disclosure statement filed January 24, 2002 fails to comply with the provisions of 37 CFR 1.97, 1.98 and MPEP § 609 because no copy for 3542090, 1238083 and the international search report were received. It has been placed in the application file, but the information referred to therein has not been considered as to the merits. Applicant is advised that the date of any re-submission of any item of information contained in this information disclosure statement or the submission of any missing element(s) will be the date of submission for purposes of determining compliance with the requirements based on the time of filing the statement, including all certification requirements for statements under 37 CFR 1.97(e). See MPEP § 609 ¶ C(1).

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 17, 25 and 27 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is not clear how the external parameters are determined, how the selector receives the signals from the control circuits and where are these control circuit signals outputted to.

Claims 17 and 25 rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential structural cooperative relationships of elements, such

omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01. The omitted structural cooperative relationships are: the control circuits and the selector.

Claim 18 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is unclear how the manipulator manipulates or what applicant means by manipulate.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

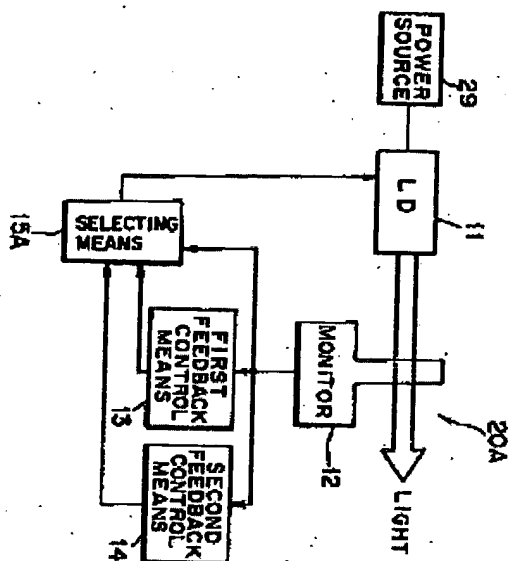

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

22-24,

Claims 17-21^{22-24,} and 25-28 are rejected under 35 U.S.C. 102(b) as being anticipated by Sato et al (PN 5,511,087).

In figure 1 Sato et al illustrates a laser system for the controlling the laser diode having a power source (29), a monitor (12), plural feedback control means (13,14) and a selecting means provided for controlling the laser diode.
